

4th March 2022

Dear Dr Ke,

I am delighted to tell you that your News and Views(NATECOLEVOL-220215857) has been accepted for publication in Nature Ecology & Evolution.

We have now transitioned to a unified Rights Collection system which will allow our Author Services team to quickly and easily collect the rights and permissions required to publish your work. Once your paper is typeset, you will receive an email providing you with a link to complete the grant of rights.

Once this step is complete, your proof will be made available through our e.proofing system via a link in a forthcoming communication. The system will show you an HTML version of the article that you can correct online. We may make minor changes to enhance the lucidity of the text, and if necessary to make it conform to the journal's style. We therefore ask that you examine the proofs most carefully to ensure that we have not inadvertently altered the sense of your text in any way.

**\*\*Please note that you will not receive your proofs until the publishing agreement has been received.\*\***

Due to the quick turn-around of this content, it is important that you let us know if you will be unreachable for the next 2-3 weeks after acceptance, in which case we ask that you kindly send us the contact information of someone who will be able to check the proofs and handle any last-minute problems. Please address any correspondence about your proofs to our Production team at [rjsproduction@springernature.com](mailto:rjsproduction@springernature.com).

Please note that we might decide to distribute a press release to news organizations worldwide. This is usually done about ten days before the paper is published and it could include details of your work.

Acceptance is conditional on the manuscript's not being published elsewhere, and on there being no announcement of this work to the newspapers, magazines, radio or television before the publication date. Nature Ecology & Evolution, however, does allow the registered journalists who receive our press release to have copies of papers a week before publication under strict embargo conditions, solely for the purpose of publicizing the work in the media. We permit these journalists to show papers to independent specialists a few days in advance of publication, again under embargo conditions, solely for the purpose of commenting on the work described. These restrictions are not intended to deter you from presenting your data at academic meetings and conferences, but any inquiries from the media about the papers not yet scheduled for publication should be referred to us.

You can now use a single sign-on for all your accounts, view the status of all your manuscript submissions and reviews, access usage statistics for your published articles and download a record of your refereeing activity for the Nature journals.

An online order form for reprints of your paper is available at <https://www.nature.com/reprints/author-reprints.html>. All co-authors, authors' institutions and authors' funding agencies can order reprints using the form appropriate to their geographical region.

Sincerely,

Simon Harold PhD  
Senior Editor  
Nature Ecology and Evolution
